UNIQUE PROGRAMMING

Each year, industry leaders rely on the Summit to learn innovative new approaches to some of their biggest business challenges. This year's theme, **"Driving Innovation and Action"** is the result of a newly appointed steering committee with a diverse mix of senior living leaders. Here is a taste of what to expect:

- ▶ **Technology and Data:** programming on how AI and machine learning can optimize outcomes, efficiency, and resource allocation in senior living and ways innovative companies are leveraging technology and data to navigate the Value-based Care Revolution.
- ▶ **Value-based Care:** integrating healthcare delivery with Senior Living, what are the new and emerging care delivery models capturing operators' attention, which model aligns best with company goals and objectives.
- ▶ **Partnership Structures:** alignment of real estate and operations, the future for management companies.
- ▶ **Workforce Strategies:** developing sustainable and unique workforce strategies; creative and alternative workforce initiatives to boost labor, such as foreign-born workers.
